

Prepurchase Exam Sheet For _____

(Name of the horse)

Date:

The following charts can be used to record significant events in the horse's medical history. The first chart is a good location to record past surgeries, problems, diseases, and treatments (ones that worked and ones that did not). The second chart can be used to record the drugs and doses of those drugs that are administered to the horse on a regular basis. The last chart can be used to record the general health status of the horse (vaccinations, de-wormings, teeth floating, hoof care etc.).

Past Problem or Surgery	Date When Problem Started or Surgery Performed	Treatment or Type of Surgery	Response to Treatment or Surgery

Medication	Dosage	Route Given PO=Orally, IN=Intranasal, IM=Intramuscular, IV=Intravenous	Frequency of Administration	Response to Treatment

Procedure Performed (Vaccination, de-worming, teeth floated, feet trimmed/shod etc.)	Date Performed	Administered By	Problems or Reactions
